
Station Transactions:
1991 through
September 1998

Station Transactions — 1991 through September 1998

In this section, we provide quarterly summaries of significant television transactions that have occurred from 1991 through September 1998. The data summarized include:

- the date a transaction was announced (rather than closed)
- the property or properties acquired/swapped
- the affiliation of the acquired/swapped property
- the Designated Market Area (DMA) in which the acquired/swapped television station operates
- the purchaser
- the seller; and
- the purchase price, on the date of announcement.

Since the majority of these transactions were private, cash flow and transaction multiple estimates were not available for most of the properties and therefore were not included.

These data can be used to determine 1) which broadcasters have been active buyers and sellers; 2) the relative prices paid for different properties in the same market; and 3) relative acquisition activity by quarter.

Sources for data in this section: Bear, Stearns & Co. Inc.; *Broadcasting & Cable Magazine*; *Broadcast & Cable Fax*; *The Wall Street Journal*; *The New York Times*.

Television Transactions -- Third-Quarter 1998

Date Transaction	Property	Affiliation	Designated Marketing Area	Purchaser	Seller	Price (at Announcement of Deal)
